SUBJECT: **Calvert Cliffs Nuclear Power Plant**
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318
Nine Mile Point Nuclear Station
Unit Nos. 1 & 2; Docket Nos. 50-220 & 50-410
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Quality Assurance Topical Report, Revision 1

Enclosed for your use is one copy (CD) of the Constellation Energy Quality Assurance Topical Report (QATR), Revision 1 (Enclosure 1). This revision is submitted annually in accordance with 10 CFR 50.71(e).

The List of Effective pages (Enclosure 2) is included. This electronic copy is a complete revision.

The following changes are included in Revision 1 and do not represent a reduction in commitment:

- 1) Sections A.2.2.2, A.2.2.3 (page 7), and Appendix E (page 46 and 47) – The duties of corrective action, self-assessment, and industry operating experience are transferred from Training to Plant General Manager.
- 2) Section C.2, Item 6 (page 33) – There was a conflict between Section A.7.3, Item 23, which requires the use of an outside qualified fire protection consultant on fire protection audits, and Section C.2, Item 6, which permits the use of either a qualified offsite fire protection engineer or an outside qualified fire protection consultant.

The QATR does not specifically take exception to the requirement for an outside independent fire protection consultant once every three years. To eliminate the conflict in the QATR and not reduce the commitment to compliance with Generic Letter 82-21, Item 6 of Section C.2 is modified to require the use of an outside qualified fire protection consultant on fire protection audits.

- 3) Section A.7.3.4.d (page 14), B.4.5, and B.4.6 (page 23) – These changes permit the acceptance of the accreditation of commercial grade calibration services suppliers based on nationally recognized certification in lieu of supplier audits, commercial grade surveys, and in-process surveillances. The

basis for this change is a safety evaluation issued to Palo Verde Nuclear Generating Station on September 28, 2005. The basis for the Palo Verde safety evaluation exception (accreditation by NVLAP or A2LA) was evaluated and determined to be applicable to Constellation Energy Nuclear Group. We are utilizing the same methods and using the same alternative requirements and exceptions as those stipulated in the Palo Verde safety evaluation.

- 4) Appendix E (page 46) – The organization chart is changed to reflect the current Constellation reporting structure.

Should you have questions regarding this matter, please contact Mr. Bruce S. Montgomery at (410) 470-3777.

Very truly yours,

CERTIFICATION:

I, Kevin J. Nietmann, state that I am Vice President-Nuclear Operations Support, Constellation Energy Nuclear Group, LLC, for Calvert Cliffs Nuclear Power Plant, Inc., Nine Mile Point Nuclear Station, LLC, and R. E. Ginna Nuclear Power Plant, LLC, and that the information contained in this submittal accurately presents changes made since the previous submittal, necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirement.
